POLYPROPYLENE CORRUGATED PRODUCTS
Corram plastic corrugated products are made with high-quality polypropylene. The material is used in many industry sectors, such as automotive, construction, printing, logistics, pharmaceutical, and retail.

Corram products have been internationally distributed since 2008, and are available in a large variety of colors, thicknesses, sizes, and weights. The sheets are either produced out of 100% virgin polypropylene or mixed with 20% recycled materials.

**SPECIFICATIONS**

**THICKNESS**
Corram sheets can be produced in a thickness between 1.5 and 10 mm. We can advise you on what thickness to choose depending on the purpose of use.

**SIZE**
Corram sheets are available in many sizes. The length can be as long as required; the width is limited to 240 cm.

**VIRGIN AND RECYCLED POLYPROPYLENE**
We can use 100% virgin polypropylene to produce your sheets. Another option is to let us recycle up to 20% of our internally regenerated polypropylene.

**FIRE-RETARDANT SHEETS**
A fire-retardant version of Corram sheets is available. Please let us know the fire rating you require, and we will produce the sheets accordingly.

**UV PROTECTION**
Corram sheets can be produced with a UV protectant. This will extend the life of the sheets and their print work when exposed to the sun.

**WEIGHT**
The weight of Corram sheets is expressed in GSM (grams per square meter). The higher you choose your GSM, the stronger and stiffer the material will be.

**COLOR**
Our customers can choose any color for the sheets or printed artwork. Just tell us what you need, and we can provide you with a sample.

**CUSTOM PRINTING**
Corram sheets can be supplied with high-resolution, full-color printing. Send us your design, and we can directly print it onto the sheets in our factory.

**CORONA TREATMENT**
We give our customers the option of printing their own sheets. If you choose this option, we will give the sheets a corona treatment to ensure they are well prepared for printing.

**PUNCTURE RESISTANCE**
We can supply our Corram sheets in any requested puncture resistance grade. Just let us know the PR you require, and we will supply the product including a test report.

**FEATURES**

- **COST EFFICIENT**
- **LIGHTWEIGHT**
- **WATERPROOF**
- **CHEMICAL RESISTANT**
- **STRONG**
- **BUG RESISTANT**
- **WASHABLE**
- **HYGIENIC**

CONSTRUCTION

TEMPORARY FLOOR PROTECTION

Corram sheets are designed to provide reusable temporary floor protection for many fixtures and surfaces during construction. The sheets offer excellent surface protection for surfaces like concrete, tile, vinyl and wooden floors. The sheets are easy to apply and cost-effective.

CONSTRUCTION

WALL AND DOOR PROTECTION

Corram sheets offer excellent surface protection for walls, corridors, glass windows, doors, counters and cabinets during construction and renovation. We can customize the sheets to any requested size or color. The sheets are also available in a transparent version, which will not block the daylight when placed on glass.
CORRUM PROTECTION

WATERPROOF MEMBRANE PROTECTION

Corram sheets are waterproof and shock-resistant and are often used to protect membranes against liquids, humidity, punctures, scratches and shocks. Corram sheets can be produced with an extra high puncture resistance in order to make the protectant even stronger.

There are many ways to apply the sheets on a surface. For example, the Corram sheets can simply be placed on top of hot asphalt before it cools down, or a solvent-based glue can be applied as an adhering agent between the surface and the protection sheet. Mineral oils, solvents, acids and bases do not affect Corram sheets.

CONSTRUCTION

BEAM FORMS

Corram boards are often used to make concrete or cement foundations. The concrete can be applied to the beam forms directly. We can supply any puncture resistance or thickness in order to make the beam form as solid as required.
CONSTRUCTION

HANDY MATS

Corram Handy Mats provide portable protection for every project. This heavy-duty, reusable protection sheet folds into three sizes for small and large jobs. Contractors and DIYers can have quick and easy protection for jobs of any size, from small fix-it jobs to large painting jobs. Handy Mats fold up for easy storage until the next project.

PACKAGING

PRODUCT PACKAGING

There are many advantages of using corrugated sheets as a packaging material for your products. A few of the reasons why our customers choose Corram-sheet packaging include the fact that it is waterproof, strong, printable, lightweight, and reusable.
PACKAGING

LAYER PADS

Logistics companies use our pallet partitioning in order to divide their products, keep them from being damaged, and to stack their product in a more stable manner. Let us know what pallet size or logo you require, and we'll be happy to make a sample.

PACKAGING

PRODUCT DIVIDERS

Product Dividers are used to keep products in place or to prevent them from getting damaged. They are also an efficient way to place more goods in a box. Let us know which products you would like to partition, and we can make a 3D example for you.
PACKAGING

CARGO PROTECTION

A lot of transportation companies use our PP corrugated sheets to protect goods that are placed on pallets. Contact us if you need advice on how to protect your material and prevent them from being damaged.

STORAGE

STORAGE BOXES

Corram storage boxes are used in warehouses, distribution centers, workshops, and other places that need items to be stored in an efficient and hygienic way. The boxes are easy to clean and very robust.
RECYCLE BINS

Corram recycle bins are used for exhibitions and events, as well as in hospitals and schools. They are easy to fold, lightweight, hygienic, and low cost. The recycle bins are fully customizable.

WAREHOUSE STORAGE

The advantage of using plastic corrugated sheets to produce warehouse boxes is that it ensures the boxes are waterproof and not affected by grease, oil, or other contaminants within a warehouse environment. It is for this reason that many car manufacturers and repair shops use Corram boxes to keep their warehouses organized.
STORAGE

TRAYS AND TOTES

Corram trays and totes can be produced in any requested shape and with personalized artwork. Send us your design, and we would be happy to create a strong tray or tote for you. These products are often produced for courier companies as mail totes, or for farmers as waterproof vegetable or fruit trays.

SIGNAGE

SAFETY SIGNS

Corram sheets are widely used as warning signs, temporary road signs, "house for sale" signs, and for many other signage purposes. Signs made out of plastic corrugated sheets are cost-effective, lightweight, and surprisingly durable.
SIGNAGE

FOR SALE SIGNS

Let us produce your For Sale sign out of PP Corram sheets. Almost any color, logo or thickness is possible. Just send us your idea, and we will design something for you or your customer.

SIGNAGE

BARRICADES

These lightweight portable panels are produced out of our heavy-duty corrugated plastic sheets between 5 and 10 millimeters. The modular design allows for multiple configurations. You can have any logo printed on them, and we have multiple colors available.
DISPLAY STANDS

We have produced and designed many different product and display stands in recent years. Feel free to send us your idea or let us design the perfect product stand to display your product in the best possible way.

ADVERTISING DISPLAYS

Whether you need an advertising display for a supermarket or a cinema, Corram advertising displays are always a great medium to deliver your message.
FAN HANDS

Fan Hands are a great way to support your team, or to create brand awareness. Send us your design, and we will make your Fan Hand out of our plastic corrugated sheets. You can request any size, design or color.

PRINTABLE SHEETS

Corram Sheets are widely used in the printing and display industry. The sheets can be supplied with a corona treatment, which allows customers to print on the sheets directly. Another option is to glue printed artwork onto the surface.
**TREE GUARDS**

Corram sheets are waterproof and bug-resistant, making them perfect to use as a base material for a wide variety of agricultural applications. For instance, the sheets are used to produce tree guards and other forms of protection for plants.

**FLOWERPOTS**

Corram sheets are bug-resistant and waterproof. This makes it an ideal material to produce flowerpots. The pots can be used on events, or just as a low-cost original flowerpot for your garden.
TOY HOUSES

Design your own toy house and have it printed with your design. We also supply plain white houses, allowing your kids to get creative by decorating their own house. Since the houses are waterproof and very strong, they are ideal for outside use.

DESIGN

Be as creative as you want! In our high-end production facility we can produce any requested shape, color, or thickness. Let us know what you would like us to produce, and we would be happy to discuss it with you.
