

# SAVERBOARD

## PROTECTING WHAT MATTERS

**Saverboard** saves your valuable floor from scratches, dents and overall damages during construction, remodeling and maintenance.

**Saverboard** is made of highly compressed LR-Fibers creating a very strong yet flexible board, which is installed in seconds and lays flat instantly.

**Saverboard** is liquid resistant. Our revolutionary Liquid Repellent Fibers offer a resistance against liquids throughout the fibers.

**Saverboard** is highly economical. Due to the flexible nature of the fibers, the board can be tightly rolled saving space. This reduces overall shipping costs, storage space and its environmental footprint.

**Saverboard** is made out of recycled paper and woodchips, and can be fully recycled.

**HEAVY-DUTY PROTECTION FOR:  
CONCRETE, WOOD, TILE, LINOLEUM, VCT,  
TERRAZZO, MARBLE  
AND ANY OTHER HARD SURFACE.**
